Hieu Le

Full-Stack Developer · Ho Chi Minh City

SUMMARY

Full-stack developer with 3+ years of experience. I build products end to end: web apps, mobile apps and the backend that keeps them running, most recently for a crypto app with **200K+ users**.

EXPERIENCE

KVY Technology · Software Engineer — 2025 – now

Cerebro (cerebro.xyz) · crypto portfolio tracker — 2025 – 2026

- Built the Next.js web app and Node.js backend as the product grew to **200K+ users** and **7K+ daily active users**.
- Built data collection across **8 exchanges** and **6 on-chain platforms**, plus the admin dashboard the team used to watch it.

Sway (sway.fun) · narrative trading app — 2026 – now

- Built a Rust service that shares the exchange's request limit so trades always go first.
- Wrote the Solidity contract that pays fee rewards on Arbitrum, plus the backend that batches and checks payouts.
- Split completed-trade matching into its own service with lag alerts; built notifications and app screens in Expo.

Madeezi · Freelance Full-Stack Developer — 2025 – 2026

- Built GreenMaster Go for **3,800+ customers** and **200 technicians**: Rails API, React admin and Expo app (case study).
- Customers sign off each visit on the technician's phone, by signature or a one-time code via Zalo or SMS.

BenKon · Software Engineer — 2024 – 2025

- Re-architected the admin dashboard, cutting page load time by **30%**.
- Shipped the BenKon App and Surface App for device control and meeting rooms; built a CMS, i18n system and icon library.

BenKon · Front-end Developer Intern — 2023 – 2024

- Built an interactive floor-plan and equipment layout editor in React and SVG, solo.

SKILLS

Languages	TypeScript, JavaScript, Ruby, SQL, Rust, Solidity
Frontend	React, Next.js, React Native / Expo
Backend	Node.js, NestJS, Express, Rails
Data	MongoDB, Redis, PostgreSQL
Infra	Docker, GCP, GitHub Actions, Sentry

EDUCATION

University of Information Technology, VNUHCM · Software Engineering, Very Good — 2019 – 2025
